EXPLOSION CAUSES PANIC.
The station was partially wrecked and the crowd of waiting passengers were thrown to the ground, flying timbers injuring many of them.
The roar of the explosion caused a panic in the town and within ten minutes the population of the place was at the scene. The sound of the explosion was heard for a radius of fifty miles.

Some of the injured were stripped of their clothing and their lodies

A special train from Sedalla arrived within thirty minutes with eigeons and nurses. Two died en route to the first of the suits of Aspelse Gas and were left at Windsor where the Coroner will hold an inquest tomorrow.

The cause of the explosion will never be known. Both men within the car were killed outright and Conductor Heisthberger's attention was diverted from the car just at the moment of from the car just at the moment of from the car just at the moment of the explosion. His theory is that Agent yake, ignorant of the contents of the box containing dynamite, threw it

carelessly out of his way, causing it to explode. OFFICIALS PROFESS IGNORANCE. The railroad officials here profess not to know whether the explosive was dynamite or powder, and say that as the waybills were all burned, it is impossible for them to say where the explosive was consigned books are checked up here.

(BY DIRECT WIRE TO THE TIMES.) DENVER, Sept. 15.—[Exclusive Dispatch.] Mrs. Cora Belle Crocker Davis Martinle, who was arrested here with her husband, had her eight-year-old daughter, Arvilla, taken from her by the Humane Society and today made formal charges to the society that T. M. Barnsdall, a wealthy Pitts-burgh oil and mining man, was the father of the child. She declared fur-ther that he for seven years contributed \$75 a month toward the little

girl's support.
Secretary Whitehead of the society declared that he would at once write Barnsdall and demand that he take full care of the child. At present little Arvilla is in the detention home. The woman today demanded that the child be given back to her and when she refused, made the statement im-

nade in private several days ago. A telegram was received today from Judge Wilbur of Los Angeles that he would send for the little girl, but Whitehead thinks the Colorado courts can deal with the case and as the lit-tle girl is here, he can force the father to make a settlement of a fair amount of money on her. supplies and a single vessel specially constructed, and we can go from Behring's Strait to the pole and right acros the Arctic ocean. Scatter the logs, port-able houses, casks, etc., upon a group of heavy ice fices surrounding the ship, shifting the supplies if necessary

ship, shifting the supplies if necessary by means of windlasses, motors or dogs and we'll succeed. A single crew can manage the three cargoes. "Had the Jeanette expedition adopted this plan it would have won. In my support Rear-Admiral Melville stated to me that a small house erected on the ice at the beginning of the drift of the Jeannette having been blown away before it had been fastened down, was found two years later less than two miles from the ship, thus proving that the ship and ice proceed just as a balloon moves with the atmosphere in which it floats.

with the atmosphers in which it floats.

"With portable studies and laboratories our artists and scientists may work in tranquility. With balleons we will view a wide belt of territory, and as did the Baldwin-Ziegier expedition frequently, despatch messengers homeward. With our logs as fuel, we will barbeeue the walrus, seal and polar bear. With the casks as emptied we'll form a flotilia filled with duplicates of our collections.

"Good scheme,' said Admiral Schley, the other day."

TAFT TALKS TO NEGROES

Addresses Conference of Methodists.

Holds Audience With Party from Indiana.

Refuses to Engage in Bryan Controversy.

[ASSOCIATED PRESS NIGHT REPORT.] CINCINNATI (O.) Sept. 15 .- Candidate William H. Taft today declined to go farther with Mr. Bryan in a

newspaper controversy over the issues of the campaign. "There is nothing in Mr. Bryan's statement of today, which seems to require an answer. Should it appear so-later, I will take up the subject in my

This, the fifty-first anniversary of Mr. Taft's birth, proved to be the busiest day he has had since his arbusiest day he has had since his arrival here a week ago. He delivered an address tonight to an audience of ministers composing the Ohio conference of the African Methodist Episcopal Church, the first speech of his campaign to negroes. The address was not positical, but gave a clear outline of the sympathetic understanding and feeling entertained for the struggles of the race possessed by the candidate. "A sympathy," he said, "which I have had from the time I was a small boy, for I inherited it from my father, Alphonse Taft, than whom the colored race never had a better friend."

RACE PREJUDICE CONDEMNED.

RACE PREJUDICE CONDEMNED. Mr. Taft strongly condemned race rejudice and mob violence, and said: The best remedy, and the necessary one, is an improvement in the admin istration of our criminal laws and the holding to strict account the officer of the law who do not use all possible means to prevent and suppress such

means to prevent and suppress such outbreaks."

Saying he realized the heart throbs of the negro, he added:
"But in spite of all he should be offered cheer—the future is brighter for him and is more in his hands than ever before. While the negro is the ward of the hation, in the sense that the nation brought him here against his will and must now deal with the problems that his presence presents and solve them justly, fairly and chartably, he is not thereby relieved from the burden of responsibility that he must assume to with his way in the community of industry and thrift to a place in which he becomes too valuable a part of society for his depreciators to ignore his rights and well-earned position."

MEETS HOOSIERS

lived, and many of his periods round Judge Taft today shook hands with a

delegation of citizens from Greenfield, ind., who passed through the city on an excursion. Mr. Taft, in a few re-

marks, said:
"I value the fact that you are interested in the campaign, as evidenced by your presence here, to meet one of the victims of that campaign engaged in going through two months of a nervous strain that would bring nervous prostration to people less able to stand such a strain than we two, or perhaps the several gentlemen engaged in the controversy."

SHAW AND BURTON CONFER. SHAW AND BURTON CONFER.
Lesile M. Shaw, former Secretary of
the Treasury, and Representative Burton of Cleveland, conferred with Mr.
Taft today. The result of the Maine
election, Mr. Taft said, after receiving
the latest returns, was in no way a
surprise, nor was it significant as bearing on/the national campaign.

"The whole question at issue," he
added, "was the resubmission of the
prohibition question. Two weeks ago
I was informed that for this reason
the Republican majority would be reduced to just about the extent is has
been."

Replying to the resolution of congratulations adopted by the New York convention, Mr. Taft today sent this

bers of the convention my grateful appreciation of their kindly expressions and their good wishes."

Apprised of Governor Hughes' remomination, Judge Tatt's remark was:
"I am very glad he is nominated."

A re-ord-breaking vote was polled through-out the State.

out the State.

The returns on the license question

The returns on the license question are not conclusive, but apparent meither the Prohibitionists nor the license advocates have made any considerable net gain.

The indications are that Miller county, in which Texarkana is located, and Poinsetta county have been captured by the Prohibitionists, while Crawford and Perny counties are thought to have been lost to the license forces.

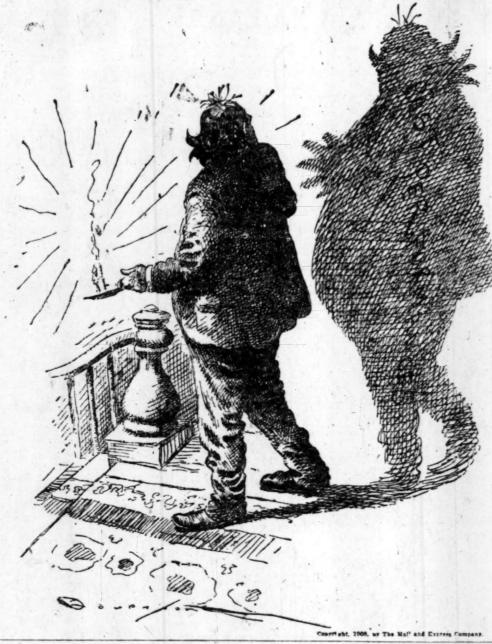

Both sides claim St. Francis and Chicot counties, which gave a large majority for license two years ago, Craighead and Green counties remain dry. WELSH PUTS OUT CARSEY.

End Comes in First Part of Fourth Round.

English Boy Simply Plays With Opponent.

Three Preliminaries Go the Full Limit.

Freddie Welsh knocked out Frank Carsey, four rounds.
Frank Picato beat Charles Anslinger,

Jack Redmond beat Charles Lucca, Walter Fisher defeated Kld Murray,

Walter Fisher defeated Kid Murray, six rounds.

All those who think that Freddie Welsh would be such an easy mark for Battling Nelson should have attended the social session held at McCarey's pug emporium last night. There were probably a lot of easy marks among the 3000 fight bugs present, but Welsh didn't give an imitation of being one of them, for he laid it all over Carsey for three rounds and then, tore into him in the fourth and knocked him out.

nocked him out.
There was no fluke about it either

knocked him out.

There was no fluke about it either for Carsey was practically out for five minutes after he was hit the last time and he sat in his corner for several minutes with his head wobbling around like a cat with her face in a pitcher, and when he finally arose to go to his dressing room he staggered across the ring and fell through the ropes on the other side. He came out of the fracas with a puffed eye and a bloody face, while Welsh was uninjured.

It was too one-sided to be a real fight. Welsh backed Carsey around the ring in every round and with the poor boy on the defensive it was easy for Welsh to feint Carsey into dangerous poses. The first round was fairly even and there was little damage done in the second. In the third Welsh drew blood from Carsey's nose with a left book to the face. Soon after the opening of the fourth, he slammed Carsey with a right on the jaw and in the next unix caught him with a left uppercut coming out of a clinch and a hard right on the jaw a second later knocked Carsey out.

Odds of 200 to 75 were offered on Welsh at the ringside, but it should have been 200 to 1, for all the chance that Carsey had. He started in seared to death and never recovered. Welsh feinted frequently and then rushed in

to death and never recovered. Welsh feinted frequently and then rushed in with right and left swings and in these rushes Carsey landed a number of good blows, but they were on the top of Welsh's head and merely served to muss his hair. Carsey was backing up all the way and these back-up kids never win enough fights to buy themselves a meal ticket. The best they get is the worst of it and Carsey got his last night, for he was up against too much class.

Association May Not Secure

ors of the Los Angeles Racing Associa-tion was not held yesterday for the very good reason that "Lucky" Baldwin, who is almost as good as The Whole Works Tom Williams, was too ill to attend the meeting. Rose, Hol-land, Schreiber, Unruh and Brink attended the "meeting," but the state-ment was given out that no business had been transacted and this is more than likely the truth, for the Almost Whole Works has a lot to say about the racing on the Arcadia track.

the two evidently kissed and made up and that Baldwin now consents to have Hamilton act as judge.

The rumored programme is to have Hamilton judge and Joe Murphy associate judge, but as a matter of fact. Murphy will be the real thing and will place the horses the way they finish and do the handicapping. Hamilton will have some kind of a name as judge, but the work will be done by Murphy, and each will receive \$50 per day. Some of the sports jokingly stated and the streets yesterday that Judge Hamilton had faithfully promised Baldwin that he would never again disqualify any of Baldwin's nags that finished first in a race and this softened the old man's stony heart. This proposition to have both Hamilton and Murphy in the stand, does away with the idea of having any local man as associate judge.

It was reported yesterday by one of the directors that it looks as if Dr. Gardner of San Francisco would again be the manager, instead of J. W. Brooks of this city. This is because there does not seem to be any possibility of Brooks and Rose coming to the directors than G.-dner, whose acquaintance is limited and who does not understand "local conditions."

With the judge question practically out of the way, the fight on the man.

There were no startling developments yesterday excépt the talk on the streets that "Jedge" Hamilton wiil probably be retained as judge this winter. He made a trip to Lake Tahoe several weeks ago to see old man Baldwin and the story comes from the inside that the two evidently kissed and made up and that Baldwin we consents to have Hamilton act as judge.

With the judge question practically out of the way, the fight on the manager is about the only thing that remains to be settled. As a matter of fact, the manager is a more important man than the judge, for a judge has little to do but to guess which horses finish one-two-thren in a race and a haif furlong.

Four and a haif furlongs will won, Wheatstone see Bell third; time, Five furlongs: Sir Barry second, Thurio third; time, Five furlongs: Brush Up.

made, and that the number is constantly growing.

Most of the gain in feathered population has been made among the laughing guils, next in order coming the Louisiana harons, the royal cabots and Forster's terms and black swimmers. Some of the species have been reduced to a painfully meager total. There are only twenty-five snowy herons left, twenty-two crowned night black herons and thirty-five Caspian terms, all of which were once abundant on the Guif but were killed off for their plumage.

In fact, the islands did not escape the hand of the poacher, and in spite of the vigilance of officials there were not some depredations by millinery pot hunters, but a better system of guarding the islands is expected to much lessen such encroachments from now lessen such encroachments from now

SAN FRANCISCO.

SAN FRANCISCO, Sept. 11.—Our bankers are a finicky lot. They have found so much fault with the new twenty-dollar places that the mint has quit coining them. Nearly a half a million has been coined and the work has been stopped until new dies are received from Washington. The bankers say that the new coins do not stack properly but other citizens are willing to overlook that if they can only get enough twenties to stack.

Joaquin Miller, poet, suspects that John Herren, miner, is facetious in offering to bequeath him a fortune and two pet jackasses. The poet is not as easy as the looks and has written the miner that he will accept the donkeys at once which proves that the bard is no sucker even if the other is a herring.

No arrests were made when Lawyer Witter smashed Merchant Grimes in the nose for charging a friend with obtaining money under false preteness. Bystanders were entirely too speedy in stopping the fight, but there is hope of further hostilities, as friends say that the difficulty between the two men is still unsettled.

In the frolicsome days before the fire "Bab's" Cafe on Larkin street was one of the warmest resorts in town, but after the fire James H. Babcock, the proprietor disappeared and now his brother has written from far away Bhode Labord

Pugilist "Jimmy" Britt, at present in Paris atudying the art treasures of the Louvre, wrote his friends that the one wish of his life is to become a lawyer. This looked good to his friends so they had his name drawn with 2400 other veniremen for the ruef jury. It was conceded that the case would afford a prospectice law student a splendid chance to study militant law, but they'll have to try again as Britt's name was stricken from the rolt.

In complaining to the police com-mission about raids in Chinatewn the people of that quarter said that the policemen trampled on the toes of in-offensive celestials. The police com-

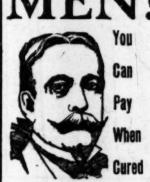

As a frenzied financier Herbert N Estes is a success. While secretary of a harness company he managed to pile up \$115,382 in liabilities and in fis voluntary petition in the Federal court to be declared bankrust is covered.

There are strained relations between the police and fire departments and the situation might almost be termed tense. At a fire the other night the hose was turned on Police Chief Biggy and Police Commissioners Keil and Cuder. It may have been accidental but there is an idea prevalent that the men at the nozzle were rejected applicants for the force.

Tennyson once dreamed of the brotherhood of man, but he was a piker compared with Dr. S. N. Schwartz who is here to found the Munificent Order of Camels of the World. The object of the organization is to promote a brotherly feeling among mankind, in general; but the doctor does not explain why he comes to the most altrustic city on earth.

My Treatment is the Only One that Positively Cures WEAKNESS

Note the announcement of all other specialists and medical institutes, and you will see how little they say about their treatment for Men's Weakness and how lightly they pass over the subject. Yet one man out of every four has a vital weakness which constantly drains his power, and that man must continually force himself along in his every-day path of living. There is no real by or happiness that is not marred by his ever-present feeling that he is not as other men. Now to such men I offer hope. Pay Me When I Cure You

Wenkness means that there is some functional derangement, the direct result of inflammation resulting from some improperly treated contracted disorder. This condition cannot possibly be removed by internal medicines, and any tonic system of treatment that slimulates the activity of the function can but result in aggravating the real allment. This is a scientific truth I have ascertained after a careful and scientific study, and upon which my own original system of treatment is based. I employ neither tonics, stimulants nor electric beits. I treat by local direct methods exclusively, and my success in curing even those cases that others have failed to temporarily relieve with their tonics is conclusive evidence that my method is the only possible means of a complete, radical and permanent cure. T WILL COST YOU NOTHING FOR CONSULTATION AND ADVICE. specially invite those who have deep-sented and chronic disorders to call d be examined. CONSULTATION AND EXAMINATION ARE FREE. SIMIAN LOVE AND REVENGE.

Curious Story of a Monkey That For-

Curious Story of a Monkey That Formulated and Carried Out Peculiar Scheme.

A curious story of love and revenge is told by the man who has charge or Barnum & Bailey's simian collection. The fact that it is the love and revenge of an African monkey doesn't abate the human interest in the narra-tive. The man who tells it had charge of a shipment of 200 monkeys, intended for the menagerie. They were confined in a large room near the furnace (the steamer was a freighter.)

Among them were two unusually intelligent simians, who were released during the voyage and permitted the freedom of the ship. Unhappily a sudden storm came up, and one of the sudden storm came up and one of the sudden storm came up. And one of the sudden storm came up, and one of the sudden storm came up. board. The remaining one, who had not seen his comrade's sudden taking off, searched the ship for hours, and finally betook himself to the rigging, where he remained three days, refushing food and avoiding all efforts to caoture him.

No doubt he held the sailors responsible for the death of his partner, and it would appear that he was formulating a scheme for revenge. Anyway, the third night he released all the monkeys in the hold, and for two days the similars bade life miscrable for the sailors. Capt. Healy was the discoverer of the Salmon View placer mines in Idaho and from there went to Montana, where he was engaged in the fur trade. where he was engaged in the fur trade. He was three times elected Sheriat of Chonteau county and proved a very efficient officer in times when steady nerves and accurate shooting were es-

While trading in Alaska he made a fortune for himself and his partners. He was firmly convinced of the future of the Northwest, and believed that its possibilities are as yet little understood. He was also much interested in Siberia, and was of the opinion that the time would come when all the beef consumed in America would be raised in that country.

in that country.

The captain probably knew more about the Blackfoot Indians than any other man in the United States. The red men at first hated him bitterly, but later fairly worshiped him. Had it not been for his counsel on several occasions they would have massacred the few traders and troops in the upper Missouri country. His success in preserving peace in the early days was recognized in Washington, and it is safe to say that there is not a retired army officer from Seattle to San Diego who will not feel sincere regret at his passing.

NIGHT AND DAY SCHOOLS.

The Young Men's Carlistian Association gives notice that it will have a number of teachers from the Evening High School, who for the past two years have been teaching in the Polytechnic building. This is possibly the first notice that the public will have that the free evening school has been called off by the Board of Education. It was attended by 1200 students last year. Both the day and evening classes will open at the new association building on Monday evening, September 28, and among the speakers will be J. H. Francis, principal of the Polytechnic High School. It will be a public meeting and all men are invited to attend and learn the details of the elaborate courses of instruction that will be obtainable.

George Obradovitch was held to answer to the Superior Court and committed to the County Jail without bail by Justice Pierce, yesterday, after his examination on a charge of having murdored Lee Forbes, a fellow ranch hand, by shooting him through the right lung at Dernott's ranch, near San Fernando, on "August 22. Forbes died at the County Hospital eight day later."

E. Dernott and Joseph Garcia, witnesses of the shooting, stated that Forbes and Obradovitch had been working on a separator since 7 o'clock in the morning, and that about 9 o'clock, as Forbes was on the upper part of the machine, Obradovitch had been working and that about 9 o'clock as Forbes was on the upper part of the machine, Obradovitch had been motion to dismiss the considered the motion to dismiss the o'clock in the morning, and that about 9 o'clock as Forbes was on the upper part of the machine, Obradovitch had been motion to dismiss the considered the motion to dismiss the o'clock as Forbes was on the upper part of the machine, Obradovitch without warning, and that about 9 o'clock as Forbes was on the upper part of the machine, Obradovitch without warning, and that about 9 o'clock as Forbes was on the upper part of the machine, Obradovitch were wrestling, and the latter was thrown. The Supervisors yesterday decided, after lengthy discussion, to fix the country tax rate for the coming year at \$1.10, the same as that of last year.

"We found it impossible to reduce the rate, much as we all desired to do so." said Chairman Patterson. "We shall need \$200,000 for the new Hall of Records, \$25,000 for two new wings and other improvements at the County Farm, \$120,000 for the administration building and two new wards at the County Hospital, while the annex to the County Jail must also be finished and allowance made for that—about \$40,000."

tiff notified the defendant that it would refuse to accept oil having more than 1½ per cent, of sulphur. It is alleged also that if the defendant had erected proper purifiers the oil could have been used without trouble.

It is asserted a new contract was made by which 120,000 berrels of Central oil were to be furnished to the plaintiff, subject to the provision of a low sulphur content. This oil was furnished, but in February, 1905, as a result of further differences, it is alleged that the plaintiff broke the terms of the contract by purchasing oil of other parties and that for this reason the defendant refused to keep its part of the contract.

About the fourth year you will be rewarded by a small crop of fruit. From that time on, each succeeding year will show a decided increase in the income from your young orchard. By the time your trees are 7 or 8 years old, you will be the proud possessor of an income property that will repay you abundantly.

I have in mind a three-acre piece of land not far from my own five acres. It has thirty-five navel orange trees and 103 Valencias ranging from 5 to 5 years old. From these, the owner received \$500 this year. Prices were low, however, and Judging from the crop of you.g fruit now on the trees, they expect from \$500 to \$1000 for their next year's crop, according to the price of fruit.

Besides these trees, they also have fity-five Valencias 4 years old, and sixty-seven Valencias a party 2 years old. Imagine what an income will be realized from this miniatur. ranch five years from now! Another fine feature on this little ranch is the fact that it is so provided with flu nes that the water easily reaches all the trees. ASTONISHING GROWTH. Lima Beans Become Bushes in North-

No Crop.

Market men and produce brokers were recently startled by reports of lima-bean vines that had become trees. Monroe P. Marks, who went North to investigate, has returned. He said, last night:

"For several years, farmers in the central portion of the State have been attempting to cultivate the lima bean, but without much success. A syndicate of San Francisco men decided that the failure was due to a lack of care, and at Ripon it set out 500 acres of lima beans. The ground is high and dry, and the greatest care was taken in selecting proper fertilizers and in every way going about the production of the succulent bean in a scientific method.

"It was only a short time before the

every way going about the production of the succulent bean in a scientific method.

"It was only a short time before the sprouts came out, and they grew very rapidly. From the day of their appearance until the present time they have been developing in an amasing manner. The vines have become large bushes, and the blossoms have been prolific, but the beans will not mature. They arrive at a certain stage, and then gradually wither away, while the plant continues to increase in size."

Mr. Marks, who is one of the oldest bean brokers in Southern California, says there is no place in, the country so well adapted to the raising of the limas as the southern part of this State. The season has opened well around Lompoc, Santa Ana, and farther south in Orange county, the harvest will be in full swing in two weeks. The beans will average almost \$5 per hundredweight.

TAFT AND SHERMAN.

For President. For Vice-President.

Mr. Bryan is showing his poor judgment by do-ing all he-can to have Mr. Taft fall on him.

Speaking of roping in the votes, the Democrats are more particularly engaged in hoping them in.

The Democratic party's boast that it would con-trol the next Congress has made a very poor start. A newspaper reporter says there is no fish big sough to pull Mr. Taft in. Mr. Taft has never

enough to pull Mr. fished at Catalina. Why has nothing been done to celebrate the visit of the soldiers to Los Angeles? Is not a soldier as important as a sailor?

Harry Thaw ought to be able by this time to write a fairly interesting book on the subject of "Jalls in Which I Have Boarded."

The autumn maneuvers of the Kaiser's army are not causing nearly so much uneasiness in Europe as the Kaiser's personal maneuvers.

When Mr. Taft goes on the stump we suppose the necessary precautions will be taken to see that the stump has been properly reinforced.

Mr. Rockefeller says his income has been greatly exaggerated. As a matter of fact, it is probably not much more than \$1.65 a second.

The Republican party must be irresistible when it can elect a man with the name of "Bert" against a man named Obadiah in the State of Maine.

We suppose it will be with airships as it has been with automobiles—a great many people will have them who cannot afford to have them.

Having such a fine growth of whiskers, it is diffi-cult to see how Gov. Hughes can always resist the temptation to talk through them; but he does.

It is sincerely to be hoped that the rumor is not true that the young men of today take into consideration the financial situation before making love

We have no doubt that Mr. Bryan will raise another laugh by claiming that the Maine election points with certainty to a Democratic victory in November.

There is a suspicion that Mr. Bryan's belief that the people do not rule is founded on the fact that they so persistently decline to vote him into the

The election dispatches of Maine speak of "missing towns." We suppose the reference is to those towns that were once supported by the now famous "abandoned farms" of Maine.

The latest news concerning Gen. Castro is that he spends a great deal of time on his feet. But there can be no particular reason for it, because nobody has yet spanked him.

"RICH RICHER, POOR POORER," EH? A In 1820 the savings banks of the United States held \$1,138,576. This was a poor country then compared with now. The amount was only an average of 12 cents for the population of that time.

That amount of average economy was very small.

Now the people of this country have \$3,690,

878,945 in savings banks. This is an average for
the whole population of this time of ower \$42. The actual depositors have an average of \$429 to their credit. In 1820 only 8635 persons in the country were rich enough to have a savings bank account. there are 8,588,811.

When James Buchanan, the last Democratic Preswhen James Bucmanan, the last Democratic President in a long line, went into office, there was about \$100,000,000 in the savings banks of the United States. By 1870, after fighting out the great war, the people, under Republican rule for twenty years, had \$550,000,000 in the savings banks. When the next Democratic President took his seat in 1883, the savings of the people had passed the bil-lion point. By 1898 the savings had doubled again.

SYMES'S HOLE AND EARL'S VACUUM. Without elaborate cyclopedic reference, let us set the persistently pert and preposterous Expresslet right on that old wives' fable as to the hole in the sky. John Cleves Symes (with any number of "m"s.") soldier or civilian, did not conceive this fable. Halley, the famous astronomer, discoverer of comets, wrote of this sky hole years before Symes. Others earlier and later heard of it. Of course, it was only a hole in the air. It did not exist save in imagination. It was bored by builders of air castles. It was not located by the dreamers at the pole, as the Expresslet inaccurately places it, but at 82 degrees north latitude. Within this hole dwelt many kinds of fantastic beings. The light did not come, as the Expresslet says, from openings at the poles of the earth. This hot-air hole had a sky of its own, a veritable firmament, and got its light from two planets, "Pluto" and "Proserpine." So there you are. The imaginary hole in the earth to earthly ones was a hole in the sky to the fancied people inside, and so it has been dubbed and ridi-culed since time before the Expresslet squeaked or Capt. Symes (two "m's" or one) wrote about it-has been so dubbed and ridiculed by most of those who (unlike the childish Expresslet) have not taken it seriously. The imaginary dwellers in this imaginary hole were in a circumambient of their own, as unearthly as the vacuum in the place where the intellectuals of the Expresslet are supposed to be. What the Expresslet obviously does not know is that this hole was really located nowhere—the present actual abode of the movement for national direct legisla-

Now, tricky and ignorant one, learn your nur-sery rhymes correctly or stay where you belong, at the foot of the class.

But all this grows out of The Times' tidings of great joy to the world that the faddists were losing vogue, that the people of the country were becoming tired of grotesque vacuums like the Expresslet and Symes's hole and the referendoodledum. The point was made as to a certain trinity of empty fads officially known as the Referendum, Recall and Initiative. We advertised them as lost, and suggested that Ida Tarbell or Dr. Mary Walker might eloped with them. These rather flighty females failed to come to the fore with the missing trip-lets from the hole in the sky; but the Expresslet came up out of the shadows east by Pluto and Proserpine with the squawking brats in its arms, and declared that they had been dry-nursed in Ohio and Missouri.

The Expresslet is overjoyed at the prospect of Folk, a Populist, going to the United States from Missouri; naturally, any politics found in the show-me State gets the approval of the organ of T'dore Bell. But its information is not luminous. Oklahoma and Missouri may have afforded a temporary shelter to the missing monstrosities; but the fact, the real fact, still stands out like a 20,000 candle arc light in the night, that both the great national conventions branded the poor things as ille-gitimate and repudiated them. No candidate ever gitimate and repudiated them. No candidate ever refers to them. Bryan fondles one nursery fad, Bank Guarantee, and turns the cold shoulder to the triplets. triplets. An attempt was made by some of the Exsslet's mock-heroic reformers to get them lodging at Chicago, but Uncle Joe Cannon and others un-tainted with socialism said they did not belong in

the Republican family, and so they were kicked out.

As to Ohio in particular, we thank the wee Expresslet for refreshing our memory. Yes, Ohio became tainted (temporarily) with faddism and sent delegate to the National Republican Convention to endeavor to secure recognition therein for the bastard triplets, "Initiative," "Recall" and "Referendum;" but the national Republican platform makers threw them out of the back door, careless whether they landed in a hole in the sky or a hole

And NOW to the real point, concerning the at-tempt of the humiliated but ever-tricky Expresslet to deceive and dupe its readers as to the alleged ac-tion of a "Republican Legislature" in Ohio in favor of the initiative and referendum, and its disreputa ble fake connecting Taft with the socialistic hum-bugs. An Ohio journalist, direct from the Ohio State capital, now in this city, on this page today so effectually smites the presumptuous fraud of the silly Earl sheet and so happily demonstrates its lack of both knowledge and veracity, that he leaves nothing to be added by The Times. Selah!

To conclude, it is our fixed opinion that the only asylum for the triplets is the "hole in the air," the where the Expresslet lives and moves and

Ta, ta, tricky one! Try to correct The Times again and fall into a trap!

MR. BRYAN'S BUSY DAYS.

M With Taft speaking as he did the other day in reply to Mr. Bryan, and with Secretary Root. speaking as he did at Saratoga on Monday, the Democratic candidate will be busier than ever he was in his life in a vain attempt to keep up with the argument. Men like Taft and Root are persimout of the reach of Mr. Bryan's pole. The facts of history are on the side of the Republican speakers; the laws of political economy are on their side; while Mr. Bryan comes to the scratch handicapped by the failure of his fallacies in the past, handicapped by his own inconsistencies, by his own repudiations of his own notions in past campaigns, nd by the utter failure of his party to "make good" when last in office. Taft and Secretary Root are just the caliber of men to set out the facts in the case and the logic of the situation in such clear

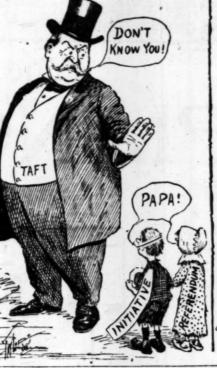

light that all may see the truth.

In silence Mr. Bryan is convicted of being in the wrong, and if he speaks he simply goes on enmesh-ing himself in a more tangled skein of fallacies in

He is on the treadmill, and no matter how fast he walks he must stand still.

The worst phase of the flagrant Express trickery, relative to the referendum and initiative in Ohio was its cheap and dirty endeavor to link Taft with the dangerous and revolutionary contrivances, whereas the fact is, as fully shown by one of the editors of the Ohio State Journal in this issue, that Taft has had nothing to do with them and the Reblican party of Ohio has expressly rejected them.

Although nothing has happened to cause President Roosevelt to go up in the Roosevelt to go up in the air, it seems that OUTCASTS.

CITY CHARTER PATCHING.

The Times never advised any official to violate his oath of office or the law. Another thing—The nes knows that a law is a law, whether it is in the Constitution, where it ought not to be, or in the code, where it belongs. Again, a law may be in the constitution of a State, where details should not be, and yet be unconstitutional when measured by the Constitution of the United States, with which all laws, properly organic, improperly so, or in the code must conform. Once more, no mandate can restrain any official or official body from appealing a question to the court if there is doubt as to its being constitutional. To appeal a case to the court is not a violation of law, excepting in the minds of half-baked Populists and red-eyed socialists, who try to set up mobocracy in spite of the safeguards of the Constitution of the United States. With these fundamental principles laid down, we

again insist that this is not the time to try to patch up the old, worn-out, inadequate, bungling, contra-dictory city charter. This legal structure is no more worth saving than a \$50 shack where a tenstory Class A building is to be put up. The old city charter should be cast into the rubbish heap and a new one written from title page to colophon. The work should be done by a body of men broad enough and learned enough to give the city an organic law which will meet the exigencies of the present and of the immediate future. There should be no undue haste about this business. We are getting along rather lamely with what we have, but we are man aging to get along. To stick a few more patches of other old notions on it will not mend it.

There is one feature of the fantastic patchwork proposed which ought to be defeated and will be defeated. Among other notions is one whose pur-pose is to disfranchise, so far as the city government goes, a large portion of the people. The self-appointed champions of the "people's rights" are in a hypocritical conspiracy to deprive a large portion of the people, the plain people of the city, of their rights and to pass the government over to the silk-stocking politicians to put in force all their narrow

fads and selfish schemes.

The faddists' panacea for all ills is the election of the whole City Council at large. This is a blow aimed directly at the rights of the plain people. The aim is to deprive the people of the Second and Ninth Wards of an even chance for representation, and those of the Sixth and Eighth of all chance. According to the faddists' proposition, these plain people are to be misrepresented by the silk-stocking politicians with political ambitions to gratify and personal axes to grind. Nine Councilmen-at-large, all to be selected by our clique, wards to be unrepresented, we-uns to be represented, say they. Oh, yes! But the plain people in all the wards will vote in a solid body against such a monstrous proposition. Such a charter amendment will certainly fail at the

We do not forget the inherent weakness in the ward plan of representation and the temptation for a ward Councilman to look out only for his constitu-ents, not for the just interests of all. But to remedy this evil it is not necessary to rob the people of the industrial wards of all voice in the city government. Let the ward representation stand as it is and add six Councilmen-at-large to the body, these to be ected without reference to ward limits.

Do this and then do away with commissions of all kinds, and let the fifteen Councilmen devote their whole time to the business of the city. Divide them into committees and give them authority over the streets, public works and other branches of the city's business. It might be well to create two branches in the Council, one to act as a check on the other.

In fact, when we sit down to take a calm survey of the situation, a multitude of considerations rise up before the mind. There are so many things to think of in making a new charter that the co sion is inevitable that time will be necessary, that a broadly-selected commission of freeholders should be created, the whole subject carefully investigated, the fullest publicity and chance for amendment and improvement given to all things proposed, and a charter thus made which will meet the needs of the

How ridiculous it is that, any committee, or society, or clique, no matter how appointed, how constituted, or who bosses it, should offer a batch of notions to be voted on before they have been properly weighed, debated and amended and the people given an opportunity to learn what their scope and aim is, through the press. Go slowly. Let us have a completely new charter.

Let it be built right, be discussed fully and adopted intelligently.

REAL NATIONAL PROGRESS.

R It was not unnatural that the triumph of Japa-nese arms over China and then over Russia should have awakened in that people much military en-thusiasm. No wonder the nation springing, armed cap-a-pie, from nothing to a great power, as Pallas from the brain of Zeus, should have been carried away.

But the development cost the people of Japan a great deal of money, and left them heavily in debt. Borne on by their enthusiasm for a while, they forgot the debt. But pay day came. Taxes bore down on the people night and day, and the load, unfelt at first, became in time awfully burdensome

To the newly-awakened people war appeared to mean progress and civilization. This false impression did not last long. The best thing heard from Japan during all these years is that the governmen has abandoned its ambitious schemes for naval and military equipment; has decided to relieve the people as much as possible from the burdens of excessive taxation, and to turn all attention to industria commercial enterprise. The economies planned will amount to \$16,000,000 a year, equal to nearly

40 cents per capita of the population.

There is no reason in the world why Japan should

go on increasing her navy and maintaining her army on a war footing. The people may peaceably expand their commerce in every way they please and no nation will object. The Japanese may live in security in their island homes and no one will

molest them.

The only purpose for a great navy and army would be foreign conquest. Good sense must inform the people of Japan that the nations will not permit China to be overrun and held in subjection by

any outsider.
So better counsels rule in Japan. The conquests will be those of peaceful development in which the people will daily gain all the comforts of life. The old programme was barbarism at the core. The policy is a great step to a higher civilization.

"EXPRESSLET" PUT IN SYMES' HOLE

By an Ohio Journalist Now in Los Angeles, Who Confounds Earl's Dishonest Sheet With Cold Facts as to Direct Legislation's Failures in Taft's State.

LOS ANGELES, Sept. 15.—[To the Editor of The Times:] The Express of the 14th inst., in an illuminating editorial, under the heading "Symmes's Hole" [assuming to correct The Times.] has the following on the subject of the initiative and referendum in Ohio:

Nevertheless and notwithstanding, as Senator Vest was wont cheerfully to say under circumstances of discouragement, the Republican Legislature of Taft's own State, Ohio, by an overwhelming vote, submits a referendum clause to the voters of that State at the November election, and the same day that witnesses Taft's success shall see that clause added to the State Consti-

With two important exceptions, the above statement is true: the first is, the last Legislature of Ohio was not Republican; the second is, no initiative and referendum addition to the Ohio constitution is pending, to be voted on at the coming Novem-

tive and referendum addition to the Onio constitution is pending, to be voted on at the coming November election.

In the Assembly that adjourned on the 4th of
May, last, the Democrats had the Senate by a majority of one—nineteen to eighteen—the House was
Republican by a majority of two votes. The fact
is, the parties were so evenly divided that neither
could accomplish any partisan legislation.

The story of the effort to engraft the initiative
and referendum upon the constitution of Ohio covers a half-dozen years; but so far as indorsement
by either of the leading parties in Ohio is concerned, it has been confined entirely to the Democrats. The agitation for the adoption of such an
article began with the Bryan wing of the party in
that State as far away as 1896, and the scheme
was indorsed by the Democrats in a number of their
State conventions, but never by the Republicans.

The first open effort to secure such a change in
the constitution was made during the first session
of the Seventy-seventh Assembly in 1906, when
Senator Atwell of Licking county, and a Republican, introduced an amendment to the constitution
providing for the initiative and referendum in the
matter of legislation. Every Democrat, although
protesting against the innovation, voted for the Atwell resolution, and in addition the following Republicans: Messrs. Atwell, Brandt, Duvall, Pollock,
Lawyer and Rathburn—making twenty-five votes
in all, or just the necessary two-thirds vote. Theresolution was messaged to the House, where it
hung until adjournment of the Assembly in April,

resolution was messaged to the House, where it hung until adjournment of the Assembly in April, 1906.

In January, 1908, at the second session, Senator Atwell reintroduced his resolution, and for a second time it passed the Senate. Weeks were devoted to its consideration, in committee and on the floor of the House. Party lines were not drawn in the debate. The most bitter antagonists of the fad were to be found among the Democrats; among its most sincere advocates were to be seen straight Republicans. As it finally passed the House, the Atwell resolution was amended, changing the per cent. of petitiohers necessary to initiate or refect legislation already made a law by the Assembly from 5 to 10, and the measure was sent back to the Senate for its indorsement of the change. The action of the House was vigorously opposed by Rev. Herbert Bigelow of Cincinnati (who was at the head of the initiative and referendum lobby, and president of the Direct Legislation League in Ohio, that had made a strong campaign for the change and secured the ante-election promise of a majority of the Senators and Representatives in favor of the adoption of the resolution,) and when the change was made, the Bigelow lobby that had swarmed about the halls of the Assembly deserted it, declaring that if they could not get what they wanted they would not stand for the proposition as amended by the House. So there the matter rested.

In the closing hours of the Senate an effort was made to secure the passage of the Wertz bill that had gone through the House, applying the principles of the initiative and referendum to municipal matters, and, if my memory serves me correctly, the bill got less than a dozen votes. As the fad had been thrashed out completely during the session and more light was secured upon the practical workings of the initiative and referendum, both parties (except a handful of radical impracticables) fought shy of it, and it lost strength and prestige with every day of the session.

workings of the initiative and referendum, both par-ties (except a handful of radical impracticables) fought shy of it, and it lost strength and prestige with every day of the session.

The story of the initiative and referendum in Ohio is a long one, but it received its body blow at the session of the last Republican State Convention, the session of the last Republican State Convention, so far as that party is concerned, when, after an all-night session of the Committee on Resolutions, when that body had been bombarded for hours with speakers in favor of a plank mentioning the initiative and referendum even in the most casual way, the subcommittee, headed by ex-Speaker J. Warren Kiefer of Springfield, resolutely set its face against the recognition of the fad in any way, and it was the recognition of the fad in any way, and it was

Kiefer of Springfield, resolutely set its face against the recognition of the fad in any way, and it was not mentioned.

The Direct Legislation League had carried on a propaganda in favor of the idea for a year previous to the sitting of the Assembly, and it was claimed that enough votes had been pledged to secure the adoption of the resolution. But they failed at the crucial time, the change in the Atwood resolution giving Senators an excuse they had been looking for to oppose the matter.

The city officials scrambled over cks and among railroad ties for a rocks and among railroad ties for a half hour inspecting the breakwater at the Angel Gate. Here, too, there has been a big saving effected on the estimates of the engineers when the appropriation for the outer harbor was made. Congress appropriated \$2,500,000 for a breakwater which was to be \$500 feet long. Capt. Fries said yesterday that the appropriation will carry the breakwater 750 feet farther than the original estimate. It will require about a year to complete the great sea wall which will be \$250 feet in length.

At the point where the work is now progressing the breakwater is 200 feet wide at the base and \$5 feet high. The massive rocks used in the breakwater average twelve tons in weight. Some of the great blocks weigh eighteen tons. While looking over the breakwater capt. Fries talked with the city officials of harbor construction on a mammoth scale by securing additional appropriations for building the sea wall further down the coast.

er down the coast.

OUTER POSSIBILITIES.

The possibilities of the outer harbor are magnificent," said Capt. Fries, "for \$7,000,000 this breakwater can be extended four miles further out in the direction of Long Beach. The water does not deepen for that distance. Such a breakwater will give additional harbor space equal to six and a half square miles with an average depth of forty feet; and there would be an additional space almost equally as large with a depth of about twenty-five feet. That means a harbor sufficient to care for the commerce of the world, and the expense is only about a tenth part what the city of London has expended on her harbor and wharfs."

Capt. Fries said that San Francisco is securing new harbor plans which provide for an expenditure of \$12,000,000 et as good a harbor as San Francisco will have after \$12,000,000 is expended at the Golden 'ate," he said.

Secretary Fleming of the Harbor Commission and Secretary Bickenback of the San Fedro Chamber of Commerce carried maps and reports "added in explaining the details of the harbor improvement plans to the visiting officials.

FIXES WALNUT PRICES

a Pound This Year-Outlook

The main purpose of yesterday's meeting of the Walnut Growers' Association of Southern California was to name the prices for this year's crop. After a long discussion behind closed doors, Secretary J. A. Montgomery of Rivera announced the following scale: For soft shells, 12% cents a pound, less 1½ per cent. freight discount; and No. 2s, 8% cents, less the discount, and No. 2s, 8% cents, less the discount.

and No. 2s, 8% cents, less the discount.

About seventy members of the association met at 10 o'clock in the Chamber of Commerce committee-room. The morning session was principally devoted to the reading of reports and the discussion of crop conditions in this and foreign countries. It was stated that the crop in the four counties of Santa Barbara. Ventura, Los Angeles and Crange would probably be over 600 carloads this \$300, an increase of nearly 15 per cent. over last year.

"The outlook for the walnut growers is very promising," stated Secretary Montgomery. "Sixteen branch associations, representing approximately three-fourths of the entire output in the State, were represented at the meeting. The quality of the nuts is very good, and the demand appears strong. Our association represents practically, the controlling interest in this country. Crop conditions abroad are not very favorable this year."

A friend opened the way to Bethley-hem, and she has from that day remained its steadfast friend, and-is now as much a part of it as Dana W. Bartlett, the untiring superintendent.

Thousands of men, women and children, now scattered all over the city, look upon her as the incarnation of all that is good and helpful, and in their troubles know where to turn for sympahty and assistance.

How many poor mothers she has lifted out of despondency; how many delicate children she has helped to feed and clothe; how many unhappy fathers she has brought to their senses and reunited them with their neglected families, will never be know.

So marked has been this part of her unselfish benevolence that one by one, the families that first came into her life with drunken fathers, heartbroken mothers and squalid surroundings, have disappeared from the Eighth Ward, and in many instances now ont their own comfortable little cottages in the future.

RECLAIMING LAND.

REPECIAL CORRESPONDENCE OF THE TIMES.]

VISALIA, Sept. 14.—Much development work is being done in the Tulare Lake region. At the Kirkoff place a dredger is being constructed to reclaim 5500 acres of land for grain planting. Frank Blakeley is putting his large acreage in grain as fast as it can be done. The water in the lake is now about six feet deep, a decrease of two feet in six weeks.

Robert St. Clair, a prominent Farmersville rancher, was thrown from his buggy. Saturday, and fell under the wheels, sustaining a broken ankle.

The new Board of Trustees for the Exeter High School has been erganized with S. T. Pennebaker, president; F. W. Mixer, secretary; Harley Smith, Charles Waiters and W. M. Mayberry. S. S. Ray is the principal and Miss Mildred Goodspeed his assistant. PECIAL CORRESPONDENCE OF THE TIMES.

LIQUOR MEN ALARMED. There are none who realize more keenly what is coming than the saloon men, wholesale liquor dealers and representatives of brewerles who operate distributing stations in the Territory. The saloon men, especially, have experienced in the short space of a year a serious curtainment of their business by the operation of the anti-gambling law and the Sunday-closing law, passed by the Territorial Legislature. The first-named law became effective January I, last, and made gambling of every description, even to the slot machine and the social poker or pitch game for cigars or drinks, a misdemeanor, punishable by a fine or imprisonment, or by both. The law cut off the most profitable part of the saloon business. Indeed, it forced hundreds of them to close up altogether, as they could not be made to pay after the gaming privileges were taken away. The Sunday law compels all saloons to close at midnight on Saturday, and remain closed until midnight Sunday, and also prohibits the sale of liquor in any town of less than 100 inhabitants.

However, the saloon men do not propose to give up without a struggle. They have already perfected the organization of a sort of mutual protective association. All who are members will contribute to a common fund, which fund will be expended in a campaign of education through the newspapers. Facts will be presented to the public, showing the benefits derived from saloons, briweries and wholesale liquor houses in the way of licenses, which yearly amount to thousands of dollars, and which money goes into the common school fund and gives to New Mexico its splendid school system. If the saloons are abolished, they say, this money must necessarily be procured from some other source, very likely by raising the Territorial tax levy, which would impose a heavier burden upon the taxpayer. There are nor

The bodies had been almost consumed by wild animals and birds, but there was ample evidence for identification. It was plain the men had been murdered as they slept and that the camp had been rifled of all valuables. Mexican officials are not inclined the believe the crime was committed by Yaqui Indians, but are investigating with the idea that renegade Mexicans were responsible. Both the murdered men were well known in Southern Arisons. O'Leary at one time was a railroad contractor, while Poe for years was a stage driver in the Southwest.

The W.C.T.U. leaders are also using the newspapers to good advantage the newspapers to good advantage the regular rate in which to expound the doctrines of temperance, and they are even going farther than this—wherever possible they are pledging the newspapers to refuse to carry liquor advertisements.

It remains to be seen whether the saloon, which, especially in the "will and woolly" West, has contributed in no small degree to its picturesqueness, and in the history of new settlements has been the first business on the ground and has outsumbered other enterprises two and three to one, is to be driven out. TO MAINTAIN ORDER

Special United States Agent Johnson of Sait Lake arrived last night to attend the Indian flests which will begin in Sobba tomorrow and last three days. A number of United States marshals are already on the ground and they will make it their business to see that no liquor is smuggled onto the reservation during the celebration. Diagraceful drunken orgies and brawls occurred at the village during previous flestas until the government had about decided to put a siop to the annual celebration. After special officers had consulted with Agent Stanley and the leading Indians it was decided to give them one more chance. Unless this flesta is conducted in an orderly and decent manner the government will forbid further celebrations on the reservation. DIRTY LINEN THUSIASM FOR ANGRY ELSINORE PEOPLE WISH

The acreage devoted to alfalfa growing is constantly on the increase and dairymen continue to add to their hefds. Still the increase in production is not equal to the demand. The two creameries and the cheese factory report that they cannot keep up with their orders, and this in face of the fact that they are offering four cents a pound more for butter fat than is quoted by the Loa Angeles to the city charter, which will be submitted to the voters in the near future. Although the subcommittee appointed by the Mayor a short time ago' recommended that the charter amendment proposition be dropped until arter the general election, the regular committee of the Council tooks different with the mast interest and also in she had so the merging of all departments into one body to be known as the Council whose members, five in number, will receive \$2500 per annum, and each will be required to give \$5000 bond; that the Board of Education consists the members, who are to be paid \$50 per month, and that the Mayor be paid a salary of \$2400 a year. It is recommended that the Des Moines plan of conducting elections be followed. If the revisions are adopted all commissions and boards new in force will be abolished.

Instead of being granted his request the lands that await settlement, the manufacturers will go out of the dairy business.

MAKES FIRST RUN.

The local lumber and box company has made its first run at its new mill in the San Jacinto mountains. Most of the lumber now being sawed will be used in the construction of buildings about the camp, but a cut of 4,000,000 feet is expected to be made before the snow flies. The mill is located in a virgin forest of sugar pine and cedar.

Death entered the Southern Pacific overland en route to Los Angeles yesterday, claiming an elderly lady identified as Belle H. McClure, who was on her way from El Paso to Fresno. The woman was found dead in her berth just after the train crossed the line into Riverside county. Death was due to consumption. Instructions were contained in this note found upon her person: "In case of my death on trip to Naraviso, N. M., I would like for all money found with me to be sent to my brother in Chicago, except so much as shall be necessary for my burial expenses." She left the address of her brother as "Samuel A. Harrison, No. 162 Randolph street, room 75. Chicago." DIES ON OVERLAND.

It makes the cheese on the macaroni melt in your mouth to talk to the en-

Pearce is a crank on the subject of preparing dishes, and she freely admits it. When the association was a smaller affair than it is today, she was at the head of its do-mestic science department. One day the head of Boston's most famous cookthe head of Boston's most famous cooking school came to Los angeles to

said, yesterday;

"Well, I like to cook, but I must say that the esthetic side appeals to me. I like pretty things, and I think things taste better if they're pretty, but I confess I am a perfect crank on coffee, and the first lessons we give are in coffee-making.

"We have the equipment here, and we want to make this the very best department of its kind on the Pacific Coast. Oh, the people who live at cafeterias! I do not believe men like them.
"We consider it so essential for girls to learn to cook. It must be learned; it can't be just picked up. There are, of course, natural cooks, and there are old southern mammiles' who are splendid cooks, but the delicacy of cooking must be learned. We can teach new ways to wemen who have cooked for many years.
"Every pupil, I am sure, teaches me something. We would be delighted to have expert cooks, both men and women, come and demonstrate to us dishes that they consider particularly fine.

"In the Boston school we used to have lessons in 'popular dishes from famous chefs for men,' and do you know, the women just flocked to them, and they always wanted to know if there was cayenne pepper in them. Oh, yes, all men like red pepper.

and they always wanted to know if there was cayenne pepper in them. Oh, yes, all men like red pepper.

"I always try to make the school attractive, and then people go away pleased. It is not necessary in our classes to teach so much about the preparation of the common foods as about the scientific preparation of delicacies, and how to make things without waste. If girls learn nothing more than to avoid waste, they will be well repaid for attending.

"When I went East people asked me: 'Have you brought any famous Mexican dishes?' Here we are more in search of the dainties provided by the great hotels and famous restaurants of the eastern cities.

"We have tried to make our kitchen as much as possible like a home kitchen, with everything sanitary and up-
